

# **IOTA Card Checking For U.S.A. Operators** **At The** **2015 Visalia International DX Convention**

Several of the U.S.A. IOTA "Checkpoints" will be available for checking U.S.A. only operator QSLs for IOTA Awards at the 2015 Visalia Convention.

This will NOT be a part of the usual DXCC Card Checking, and will NOT take place during the Friday Night IOTA DINNER event.

A limited number of requests will be accepted, so if you are seriously interested in submitting an application of no more than 120 IOTA QSLs to be checked at the Convention, please send an email A.S.A.P. to [islands@w9dc.com](mailto:islands@w9dc.com) and indicate the number of cards you plan to submit. This will help ascertain the volume of IOTA QSLs to be checked.

Full details and procedures will then be emailed directly to you, including the location for drop-off and pick-up of QSLs at the Convention. Please "Whitelist" Don's email address and/or be sure to check any SPAM filtering folder(s) for a reply. You will be notified if you are one of the applicants approved for card checking in Visalia (or if not).

The joint IOTA/IREF table with informational items will be located in the large hallway area across from the Convention Center Exhibit Hall entrance. You are invited to stop by for an eyeball QSO with some of the friendly IOTA/IREF folks!
